SUMMARY

Software Engineer with over 3 years of experience designing, developing and maintaining scalable web applications and RESTful APIs. Proficient in modern JavaScript/TypeScript, PHP and Python ecosystems, with a strong focus on delivering secure, high-performance systems and clean, maintainable code. Experienced in full-stack development, from architecting databases to building responsive front-end interfaces.

CORE TECHNICAL SKILLS

- **Back-end:** PHP (Laravel), Java, Python (Django), Node.js (Express/NestJS), Ruby on Rails
- **Front-end:** JavaScript (ES6+), TypeScript, React, Vue.js, HTML5/CSS3
- **Data & Messaging:** PostgreSQL, MySQL, MongoDB, Redis, Kafka
- **DevOps & Reliability:** Docker, CI/CD (GitHub Actions), Prometheus, Sentry
- **Architectural Patterns:** DDD, SOLID
- **Other:** Git, RESTful API design, external API integration, Agile/Scrum methodology

PROFESSIONAL EXPERIENCE

Full Stack Software Developer — Jomih Technologies

Aug 2025 – Present | Remote

- Design and maintain front-end and back-end components for diverse client web applications using PHP and JavaScript.
- Integrate secure payment and banking APIs (Daraja, Stripe) and messaging services.
- Troubleshoot and optimize applications for enterprise clients, ensuring reliability and performance.
- Led technical requirement gathering and converted business needs into scalable architectural blueprints.

Full Stack Software Developer — Boni

Dec 2023 – Aug 2025 | Remote

- Developed backend services using Ruby on Rails and implemented REST APIs for high-traffic applications.
- Improved UI responsiveness and feature delivery using Vue.js.
- Contributed to scaling system architecture to support over 100,000 users.

Full Stack Software Developer & IT Support — ETNET

Apr 2024 – Sept 2024 | On-Site

- Led end-to-end development of internal workflow and billing systems used organization-wide.
- Performed rigorous system testing, documentation, and technical training for internal users.

Full Stack Software Developer (Contract & Freelance)

Apr 2022 – Nov 2023

- Developed full-stack web applications for various sectors and clients through freelance platforms (like truelancer and upwork) and through client referrals.

PROJECT EXPERIENCE

Property Management System – <https://rentals-manage.rf.gd>

Developed a complete rental solution with integrated rent payment flows and automated tenant notifications.

Bursary Management System – <https://bursary-manage.rf.gd/>

Developed a solution to bursary management service from students application to officials' reviewing of applications to awarding of bursaries to the qualified.

Zanake (Open Source) – <https://github.com/zanake/zanake>

Contributed tests, bug fixes and issue reporting to a public JavaScript library.

EDUCATION

Bachelor of Science in Mathematics

Machakos University — *Sept 2016 – Nov 2020*

Software Development (Flatiron Curriculum)

Moringa School — *May 2022 – Nov 2022*
